HE Body of Troops which has blocked up Beigrade, is encamped from one Side of the Danube to the other, upon two rifing Grounds, on the Right and Left. Belgrade flands on a Point, at the Conflux of the Save and the Danube, 'tis entirely faut up on the Land Side,

eferes a Communication by the River. The who commands the Troops of the Blockade, two Detachments to block up Sabacz and a, two Forts, in each of which there's an Imrison. The Grand Vizier is also advancing Belgrade, with 50,000 Men of the bett Troops, and such a frighful Train of Artil-leaves no room to doubt but he intends to that Place. 'Tis even faid, that this General, hen once he has formed a Resolution, never from it, has obliged the Officers of his Army rupon the Alcoran, that they will lose their in the Siege rather than give it over. The ity of Semendria, figuate on the Banks of the and which has only a Wall to defend it, has biged to capitulate to the Turks; and the Gamissing of 800 Men, has been conducted Guard to Belgrade. The Officer who comthe said Garison reports, that as he came ton Semendria, the Grand Vizier had just he Morave with a great Body, having the Se-of Widdin with him, and the chief Bashas ers of the Ottoman Army: He adds, that could be more pompous and fplendid than the of this Grand Vizier, on account of the mage he carries with him, which is of the Magnificence. The Viziers of the Bench, ecretaries of State at the Porte, are in his in order to perform their Functions in the tions for a Peace, in case that Things should a Suspension of Arms; which, however, is to happen very foon. The Arrogance of the of great at present, that they form the vallest crashest Projects: Yet, 'tis known by private that the Grand Vizier has a Permillion to 2 Suspension of Arms with the Emperor; his Imperial Majesty leaves the Grand sig-Liberty to deal as he thinks fit with Ruffia; is a Condition which is never like to be com-

Advices say, That the Basha of Bosnia, who soo Men under his Command, has passed the sin 20,000, to join the Grand Vizier. The Army is encamped between Semlyn and Pe-dia. Some of the Bavarian Battalions, in their of Hungary, have not behaved themselves so might be expected from Friends: The Solpected to have their Provisions at an Undersid that the Coin of Bayaria should be passed in Places at the Rate of that of Austria: and in Places is was denied, they seized all the Provisions id find in the Inns, beat the Landlords, and hem out of Doors: But, to give the Officers e, they did every thing in their Power to their Licentiousness.

Poll-mafter of Belgrade writes, in a Letter hat Place in form of a Half-moon; and that it is fedured, from the great Number of the Co-bat it confifted at least of 70,000 Men. The the Lurks Arm izier, for the Encouragement of the Inhabithe Places to which his Army advances, has d a fort of Manifelto, declaring, that they under no Apprehension from the Army; that remain quier at their own Houses, and exery Man his own Religion and Trade, with-r of Molestation from the Mussulmen, who ly enjoined not to disturb them; and that if me of a Ducat per Head, which the Grand pofes on them as well as on his other Subthought too burdensome, they need only apthought too burdensome, they need the the Grand Vizier, who will take Care to rein his own Name.

in Polith Ruffia, Sept 6. O.S. We have an here, that the Ruffian Army under the Velt de Munich repassed the Bog about a Week

ago, and was marching to Winter Quarters in the Ukraio; but is harraffed Day and Night by the Tarters. The Bashas of Bender and Chocaim have caused Rejoycings to be made in those two Towns, upon account of the Return of the Russians towards the Borysthenes. We are just now informed, that a great Body of Tartars, having attacked the Veit Marshal de Munich's Rear Guard, on the other Side of the Bog, was repulsed and put to Flight, with the Loss of a great many Men killed, besides the Wounded. The Letters from the Camp at Winnica confirm, that a Body of Turks is on the March towards Oczakow.

Rome, Sept. 9. O S. The Persian Christian who is Force. Munich's Rear Guard, on the other Side of the Bog, was repuled and put to Flight, with the Los of a great many Men killed, besides the Wounded. The Letters from the Camp at Winnica confirm, that a Body of Turks is on the March towards Oczakow.

Rome, Sept. 9. O. S. The Persian Christian who is arrived here, has delivered a Letter from Kouli Kan arrived here, has delivered a Letter from Kouli Kan

to the Congregation de Propaganda Fide, wherein he affures them, that as he had a very great Effects for the Christians, he delighted to favour and protect those who are settled in his Dominions; and that all the Missionaries who came thither for the future, should enjoy the same Advantages. We are affured, that he has a Letter of the same kind to deliver to the Pope, together with Kouli Kan's Picture.

Paris, Sept. 22. O. S. Signior Mattheo Egizio, Secretary of the Sicilian Embaffy at this Court, a Gentleman of a diffinguished Rank among the Learned in the Kingdom of Naples, has just published a Critician of Market Market and Albert Court of the State of the Stat ticism on the Method to learn Geography, by the Abbe Langlet du Fresnoy, which contains a great deal of Learning, and very curious Remarks on the Antiquities and Rarities of feveral Cities of Europe. On the 4th ult. died at the Caffle of Garee, among the Mines of Bompean near Rennes, M. Thomas Dupuis, one of the King's Council, Mafter of the Requests, formerly Intendent of Canada and Advances Garage. merly Intendant of Canada, and Advocate General of the Grand Council. He was very much effect of by the Learned for his perfect Knowledge of the Arts and Sciences, especially of the Mechanicks. He was about 59 Years of Age, and just upon the Point of executing his grand Project for draining the Water out of the Mines of Bretagne. His Widow has fent one that was bred up under her Husband to the Spot, in order to compleat that Work which the Deceifed had almost brought to Perfection. M. Dupuis was the first who fram'd the Globes according to the Cogernican System. The Hydraulick Ma-chines of his Invention, are the Admiration of the Learned of this City, and of foreign Parts. Vienna, Off. 1. N. S. We have Letters of the 24th

past from the Army at Semlin and from Belgrade, where every Thing is quiet, and not a Turk to be feen; Vipalanka indeed, in the Bannat, has furrendered; but Panchova, which lies over-against Belgrade, and had been falfly reported to have been burnt, is putting into some Posture of Defence, and for that Purpole M. Berenclau has been fent thirher with 800 Men, confisting of Heydukes and Hussars; and at Belgrade itself, the Works are carrying on with great Diligence, whither, as is affured by Letters of the 24th, 50,000 Head of Sheep and Cattle have been carried by certain Inhabitants in that Neighhourhood. There has been a Report that the Turks had attacked Raticha, and had been repulsed; but this wants Confirmation: Neither is there any News from Sabatz or the Neighbourhood of that Place.
